

Črtice sa Plenarnog godišnjeg zasedanja komiteta  
ISO/TC 37 Language and Terminology  
Takamatsu Japan, 22-28.6.2025.

prof. dr Ranka Stanković  
Predsednik nacionalne komisije A37 Terminologija  
Član radne grupe SC3 WG6 6 Terminology Management and Artificial Intelligence

## 42. plenarni godišnji sastanak ISO/TC 37

- Sastanci su održani u Takamatsu Symbol Tower, gde se nalazi Kagawa International Conference Hall
- U ime ISS sam učesvovala u okviru sponzorstva ISO organizacije.
- U plenarnom delu prvog i poslednjeg dana su učestvovali svi potkomiteti u radne grupe zajedno, dok se ostalih dana rad odvijao tematski, po radnim grupama.
- Osnovni predmeti rada su bili
  - analiza informacije o postignutom napretku u izvršavanju zadataka,
  - ideje o pokretanju novih projekata i
  - glasanje po uspostavljenim rezolucijama.

~400K  
stanovnika,  
Takamatsu  
glavni grad  
Kagawa  
prefekture,  
ostrvo  
Šikoku  
(jug  
Japana)

## Okvirne teme

- Među različitim informacijama i paralelnim sesijama (uglavnom 5-6) najviše sam se fokusirala na SC4 ali i na SC3/WG6.
- Tema veštačke inteligencije, njenog uticaja na procedure rada koje se propisuju standardima i etička pitanja su diskutovana u okviru skoro svake radne grupe gde sam prisustvovala.
- Na plenarnom zasedanju SC4 odmah na početku je kao ključna tema navedeno „TC37/SC4 & AI/LLM paradigm shift“.
- Kako sam po prvi put prisustvavala uživo sastancima ovog tipa, interesantno i nadahnjujuće je bilo videti način na koji se diskutuje i razrešavaju dileme i dostavljeni komentari: sistematicno, jedno po jedno pitanje, a i kod različitih mišljenja je dolasilo do usaglašavanja ili preglasavanja.

# Skraćenice

U oznaci ISO/TC 37/SC, skraćenica SC označava Subcommittee (potkomitet ili podkomitet).

Dakle, ceo naziv:

- ISO (International Organization for Standardization) – Međunarodna organizacija za standardizaciju
- TC (Technical Committee) – Tehnički komitet
- SC (Subcommittee) – Potkomitet (podkomitet)

Oznaka ISO/TC 37/SC 4 WG 4 označava:

- Tehnički komitet br. 37 („Terminologija i drugi jezički i sadržinski resursi“),
- Potkomitet br. 4 („Upravljanje jezičkim resursima“).
- Radne g WG 4 - Lexical resources (Leksički resursi)

# ISO/TC 37 Language and terminology

Tehnički komiteti

- ISO/TC 37/SC 1 Principles and methods
- ISO/TC 37/SC 2 Terminology workflow and language coding
- ISO/TC 37/SC 3 Management of terminology resources
- ISO/TC 37/SC 4 Language resource management
- ISO/TC 37/SC 5 Translation, interpreting and related technology

U dodatnim, nezavisnim radnim grupama:

- ISO/TC 37/WG 11 Plain language
- ISO/IEC JTC 1/SC 42 /JWG 5 Joint Working Group ISO/IEC JTC1/SC42 - ISO/TC 37 WG: **Natural language processing** (ISO/IEC JTC 1/SC 42 Artificial intelligence)

Rukovodstvo:

- Alex Chengyu FANG (Hong Kong)

# **ISO/TC 37/SC 3 Management of terminology resources**

Radne grupe

- WG 1 Data categories
- WG 3 Data interchange
- WG 4 Database management
- WG 6 Terminology management and artificial intelligence

Rukovodstvo:

- Committee Manager: Mrs Annette Preissner, DIN (German Institute for Standardization)
- Chairperson: Ms Hanne Smaadahl (SAP)

## **ISO/TC 37/SC 4 : Language resource management**

### Radne grupe

- WG 1 Basic descriptors and mechanisms for language resources
- WG 2 Semantic annotation
- WG 4 Lexical resources
- WG 5 Workflow of language resource management Working group
- WG 6 Linguistic annotation

### Rukovodstvo:

- Committee Manager: Dr Miran Choi, Secretariat: KATS (Koreja)
- predsedava: Prof Key-Sun Choi
- upravo pridružen na različitim pozicijama radnih grupa Alex Fang (Hong Kong)

# WG 1 Basic descriptors and mechanisms for language resources

- XML je osnovna serijalizacija u standardima
- Odlučeno je da se uvede i JSON serijalizacija za LAF
  - LAF: ISO 24612:2012(en) LRM — Linguistic annotation framework
  - Demonstrirani su primeri opcija
    - LAPPS LIF (<https://wiki.lappsgrid.org/interchange/overview.html>),
    - JSON-LD (<https://json-ld.org/> JSON for Linking Data),
    - PubAnnotation (<https://www.pubannotation.org/>), ....
- I druge radne grupe su takođe pominjale dodavanje JSON serijalizaciju u primerima osim XML serijalizacije, imajući u vidu ekonomičnost i sve veću upotrebu JSON-a.

# WG 1 Basic descriptors and mechanisms for language resources

- Jedan od poznatih problema sa standardom SynAF ISO 24615-1:2014 Language resource management — Syntactic annotation framework (SynAF)
  - poziva se na **ISOcat servis** koji više ne radi, tako da je nemački tim inicirao da se uradi prevremena sistematska provera tog standarda, da se ne čeka uobičajeni period od 5 godina.
  - živa disusija....

Conference Place yyyy-mm-dd

## RESTfull web service interface

<http://www.isocat.org/rest/>

The screenshot shows a Microsoft Internet Explorer browser window displaying the ISOcat RESTful web service interface. The URL in the address bar is <http://www.isocat.org/rest/>. The page title is "RESTful web service interface". The main content area displays the ISOcat logo and navigation links for "Introduction", "Resources", and "Remarks". A sidebar on the left lists numbered steps from 1 to 5. The "Resources" section contains a table with a single row for "an user's workspace". The table has columns for "Resource", "URL", "Variable", "cardinality", "value", "description", and "notes". The "URL" column shows the pattern <http://www.isocat.org/rest/user/{username=guest}/workspace>. The "Variable" column shows "username" with cardinality "1" and value "[a-zA-Z0-9\_]+". The "description" column states "the unique name which identifies the user in the system" and "the default 'guest' username gives access to the public contents of the DCR". The "Notes" column is empty. Below this table, another table for "method(s)" is shown, with "Methods" containing "HEAD" and "GET", "description" containing "check if the workspace exists; i.e., basically a check if the user exists", and "notes" containing "get the workspace of the specified user".

# Primer rešenja problema sa servisom

PID URL's in DatCat Info (ovo oni stavljaju za ISO/WI 30042 TermBase eXchange (TBX)) (dobijeno od SC3 - Hana):

datcat/DC-0168](http://datcatinfo.termweb.eu/datcat/DC-0168)
- [http://datcatinfo.termweb.eu/  
datcat/DC-0489](http://datcatinfo.termweb.eu/datcat/DC-0489)
- [http://datcatinfo.termweb.eu/  
datcat/DC-2677](http://datcatinfo.termweb.eu/datcat/DC-2677)

The screenshot shows a web browser displaying the URL <https://datcatinfo.termweb.net/en/dict/202/495519/1947502?lang=xho&target=eng%2Cfra%2Czul&section=0&domain=0&term=DC-0168>. The interface is a search tool for ISO 30042 Data Categories (DCs). It has dropdown menus for 'Source' (set to 'PID') and 'Target' (set to 'English'). The search bar contains 'DC-0168'. Below the search bar, the results are displayed for 'DC-0168'. On the left, there is a table with columns for 'DC ID', 'Section', 'Active Data Categories', 'Standard', 'Origin', 'Profile', 'Implemented as', 'Justification', and 'Domain'. The right side shows detailed information for the selected DC, including its Concept ID (495519), definition (definition), section (Active Data Categories), standard (ISO 10241), origin (ISO 12620), profile (Terminology), implemented as (string), justification (Critical element for terminology, lexicography), and domain (Terminology > TBX-Basic). At the bottom, there is a summary box for the selected DC, listing its PID (DC-0168), explanation source (DatCat Council), explanation (This is the unique persistent identifier for this data category.), and note (http://datcatinfo.termweb.eu/datcat/DC-0168).

DC ID	Section	Active Data Categories
DC-0168	Active Data Categories	definition
Standard	ISO 10241	
Origin	ISO 12620	
Profile	Terminology	
Implemented as	string	
Justification	Critical element for terminology, lexicography	
Domain	Terminology > TBX-Basic	

**DC-0168**

Explanation source: DatCat Council

Explanation: This is the unique persistent identifier for this data category.

Note: http://datcatinfo.termweb.eu/datcat/DC-0168

## **WG 2 Semantic annotation**

Radna grupa WG2 koja se bavi semantičkim anotacijama (SemAF, ISO\_24617) ima brojne delove:

- SRPS\_ISO\_24617-1\_2018 - Оквир за семантичку аnotацију (SemAF) — Део 1: Време и догађаји (SemAF-Time, ISO-TimeML)
- SRPS\_ISO\_24617-4\_2018 - Оквир за семантичку аnotацију (SemAF) — Део 4: Семантичке улоге (SemAF-SR)
- SRPS\_ISO\_24617-6\_2018 - Оквир за семантичку аnotацију — Део 6: Принципи семантичке аnotације (SemAF принципи)
- SRPS\_ISO\_24617-7\_2023 - Semantic annotation framework — Part 7: Spatial information
- ....

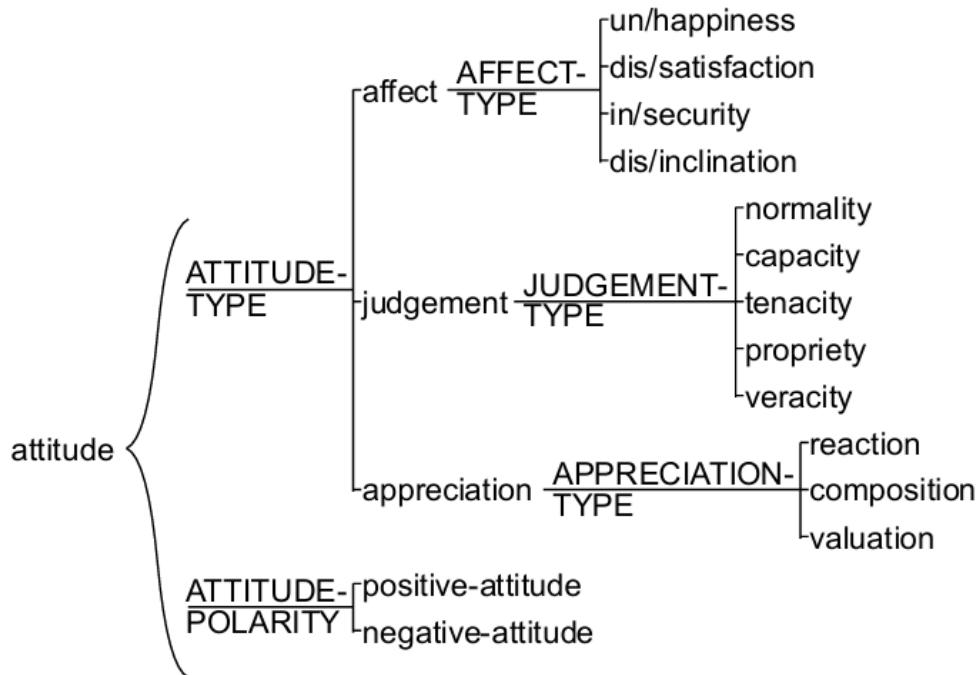

## WG 2 Semantic annotation

Radna grupa WG2 koja se bavi semantičkim anotacijama (SemAF) pokreće nove delove standarda koji se odnose na

- Deo 16: Evaluative language, naročito interesantan jer predstavlja modeliranje zauzimanja stava, mišljenja ili osećanja po nekom pitanju
- Deo 18: pokrete i opisivanje dinamike u prostoru, uz predlog korišćenja specijalizovane notacije UMR.
- Deo 19: Lexical semantic similarity koji treba da obuhvati metode zasnovane na znanju, na rečnicima, na korpusima, na neuronskim mrežama i jezičkim modelima, kako bi se kreirao jedinstveni okvir za **leksičku semantičku sličnost**.

# Evaluative language

- Zasnovano na Teoriji procene (Appraisal Theory)
- Jiamei Zeng, Min Dong, and Alex Chengyu Fang. 2024. **Annotating Evaluative Language: Challenges and Solutions in Applying Appraisal Theory.** 20th Joint ACL - ISO Workshop on Interoperable Semantic Annotation @ LREC-COLING 2024, pp 144–151, Torino.  
<https://aclanthology.org/2024.isa-1.17/>

# Online Standards Development (OSD)

- Održan je i kratka obuka o korišćenju ISO platforme „Online Standards Development (OSD)
  - omogućava zajednički rad na dokumentima,
  - direktno povezivanje sa terminologijom,
  - komentarisanje delova standarda i njihovo razrešavanje.
- Alat zamenjuje rad sa „tabelama sa komentarima“ i ručnu harmonizaciju različitih verzija istog dokumenta.
- Svaki korisnik može imati različite uloge: reader, OSD commenter, author, OSD voter, leader.

CLAUSE INTRODUCTION

## Introduction

Terminology Management is a critical process that underlies many industries, enabling precise communication across languages and domains. However, the manual effort required to manage terminology can be time-consuming, costly, and error-prone. The increasing availability of Artificial Intelligence (AI) technologies presents an opportunity to automate and enhance various stages of Terminology Management.

This technical report aims to explore the application of AI to each task of Terminology Management, highlighting the opportunities for improvement, suitable AI tool categories, underlying techniques, risks, and best practices. By leveraging AI, terminology management can become more efficient, accurate, scalable, and accessible across industries. This report provides a comprehensive analysis of AI-driven solutions for terminology collection, description, processing, and presentation, offering practical guidelines and case studies to demonstrate the potential benefits of adopting these technologies by terminology professionals and can lay the ground for building new AI systems that can be more tailored to the needs of Terminology work.

CLAUSE SCOPE

## Scope

This technical report aims to explore the role of AI in terminology management, particularly in automating and enhancing related stages and tasks. By leveraging AI-driven methodologies, organizations can improve efficiency, accuracy, and scalability in terminology work. This report serves as a guide to understand capabilities, risks, and best practices of using AI for terminology management. It also presents the challenges, including ethical considerations, data quality, and domain adaptability, of adopting AI for terminology management.

# Pažnja, pažnja...

Dva dokumenta su naročito komentarisana i na njih se više puta vraćalo:

- Artificial intelligence Guidance on use of artificial intelligence (AI) for ISO committees  
[https://www.iso.org/files/live/sites/isoorg/files/developing\\_standards/who\\_develops\\_standards/docs/use%20of%20AI.pdf](https://www.iso.org/files/live/sites/isoorg/files/developing_standards/who_develops_standards/docs/use%20of%20AI.pdf)
- Inclusive / non-inclusive terms: [https://www.iso.org/resources/publicly-available-resources.html?t=1LSJG9ms7Qyjks\\_YM6YiW5Q\\_pyDJxI2UR4ZDkyWhbJ-diDNZWVuXsKerDxDhj\\_T&view=documents#section-isodocuments-top](https://www.iso.org/resources/publicly-available-resources.html?t=1LSJG9ms7Qyjks_YM6YiW5Q_pyDJxI2UR4ZDkyWhbJ-diDNZWVuXsKerDxDhj_T&view=documents#section-isodocuments-top)

Otvoreno pitanje:

- Ako neki LLM da korektnu definiciju koju želimo uključiti u standard, rečnik,... kako navodimo izvor?
- Najverovatnije: “Definicija izrađena pomoću ChatGPT (GPT-4.5), OpenAI, 10. jul 2025.”

## **Status O - observer, P - participant**

Uloga u radu mi je bila uglavnom kao posmatrač, sem što sam se aktivno i formalno priključila (uz koordinaciju sa nacionalnim centrum ISS) grupi SC3/WG 6 Terminology Management and Artificial Intelligence

- rukovodilac Mohamed Khemakhem
- glavna tema je bio document ISO/AWI TR 25896  
(Approved Work Item – AWI, TR – Technical report)

# ISO/TC 37/SC 3 Management of terminology resources

SC 3/WG 6 "Terminology management and artificial intelligence"

ISO/AWI TR 25896ed.1 - id.91875 ISO/TC 37/SC 3/WG 620.00

Prijavili smo se za aktivno učešće (status P)

U ostalim radnim grupama smo posmatrači (status O)

Jedna od tema je bilo i DatCatInfo - The international database of data categories for language resources in support of Natural Language Processing:

[datcatinfo.termweb.net/en/dict/202?lang=eng&target=0&section=0&domain=0](http://datcatinfo.termweb.net/en/dict/202?lang=eng&target=0&section=0&domain=0) .

## Sve u svemu...

- “Terminology Management Meets AI” je vrlo aktuelna tema o kojoj se prilično govori i piše.
- Pokrenuta je i inicijativa za kreiranje Ad hoc grupe za AI-LLMs za Language Resource Management. Poziv za eksperte će tek da usledi.
- Novo iskustvo za mene koje će pomoći da se rad u okviru nacionalnog komiteta intenzivira i
- kao prva stavka da se naziv komiteta usaglasi sa odgovarajućim i da umesto A037 Terminologija bude A037 „Jezik i terminologija“ ili neki sličan predlog, ali da bolje odgovara originalnom „Language and terminology“
